**DETAILED ACTION**

1. This Office Action is responsive to the Amendment filed on 1/26/04.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 32 and 34 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01.

Claim 32 omits functional/structural/connectional interrelationships of component “matrix multiplier” with other components (e.g., “mismatch trainer”, “feedback conversion unit”, “demodulator”, “mismatch multiplier”, “in-phase/quadrature phase modulator”, “mismatch adjustment circuitry”, etc.), recited in claims 31 and 32, for making the claimed invention as a complete operative/connective system.

Claim 32 omits functional/structural/connectional interrelationships of components “mismatch adjustment circuitry” and “in-phase/quadrature phase modulator” with other components (e.g., “mismatch trainer”, “feedback conversion unit”, “demodulator”, “mismatch multiplier”, etc), recited in claims 31, for making the claimed invention as a complete operative/connective system.

Claim 34 omits functional/structural/connectional interrelationships of components “processor”, “predistorter”, “a predistorter trainer” and “mismatch adjustment circuitry” to one another, and omits functional/structural/connectional interrelationships of these components with other components (e.g., “feedback conversion unit”, “demodulator”, “mismatch multiplier”,

etc.), recited in claim 31, for making the claimed invention as a complete operative/connective system.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claims 31, 33 and 34 are rejected under 35 U.S.C. 102(e) as being anticipated by Masenten (6,535,560).

As per claim 31, see figures 1-4 and col. 3, line 39 to col. 14, line 58, Masenten discloses a system comprising:

a mismatch trainer (112) (see figure 1) to adjust a value of a mismatch parameter (Calibration Parameters); and

a conversion unit (110) (see figure 2) having a demodulator (120) and a mismatch multiplier (122), wherein the mismatch trainer adjusts parameters of the mismatch multiplier.

As per claim 33, Masenten discloses that the mismatch trainer adjusts the parameter iteratively (see figures 3 and 4).

As per claim 34, Masenten discloses that system comprises a variety of components (see figures 1-4).

***Allowable Subject Matter***

6. Claims 3, 4, 7-25 and 35-37 are allowed.

***Response to Arguments***

7. Applicant's arguments filed on 1/26/04 with respect to claims 3, 4, 7-25 and 31-34 have been considered.

The rejections to the claims based on Wright et al (6,587,514) are now withdrawn since the claims have been amended to overcome the rejection.

However, regarding to claims 31-34, upon further consideration, the claims are deemed not patentable with reasons set forth above in this Office Action.

***Conclusion***

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 2631

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
